VIII. VALUATION METHODOLOGIES

Valuation by its nature, cannot be regarded as an exact science and the conclusions arrived at in many cases will be subjective and dependent on the exercise of individual judgement. Given the same set of facts and using the same assumptions, expert opinion may differ due to the number of separate judgement decisions. There can therefore be no standard formulae to establish an indisputable value, although certain formulae are helpful in assessing reasonableness.

For the purpose of determining the equity value, a valuer may use any of the approaches as per Indian Valuation Standard 103. Different valuation approaches has been proposed and the same has been considered below along with the justification.

IX. APPROACHES OF VALUATION

There are three approaches for valuation of a company, such as:

- (a) Income Approach;
- (b) Market Approach;
- (c) Asset Based Approach;

Recommendation of share exchange ratio for the proposed amalgamation and share entitlement ratio for the proposed demerger

Each of these approaches has its suitability, depending upon the facts of the case and the objectives of the valuation. For the sake of ready reference, these methods are explained below in brief.

(i) Income Approach

Income approach is the valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalized) amount. The fair value measurement is determined on the basis of the value indicated by current market expectations about those future amounts. The most commonly used income approach is Discounted Cash Flow (DCF) Method.

DCF Method

Based on our discussion with the Management, we understand that Demerged Business of RESL is profit making business and generates surplus cash, going forward as well the Demerged Business is expected to make profits and generate surplus cash in the foreseeable future, we have therefore used Income Approach (DCF cash flow method) which is one of the most commonly used and internationally accepted pricing methodology of valuation for valuing the demerged businesses.

Further I understand that Resulting Company was recently incorporated and is yet to commence its business operations, hence we have not used DCF method for the purpose of arriving at the fair value of Resulting Company.

(ii) Market Approach

Under this approach the valuation is done on the basis of the quoted market price of the Company in case it is a publicly traded company, or publicly traded comparable businesses date is reviewed in order to identify a peer group similar to the subject company and then their multiples are applied to the entity being valued to determine the fair value.

Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

The following are the common methodologies for the market approach:

- Market Price Method;
- Comparable Companies Multiple Method; and
- Comparable Transaction Multiple Method

Market Price Method

In case of a company, the equity shares of which are listed, the market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in.

In current case, shares of Transacting companies are not listed on any on any stock exchange and also Demerged Business does not have an independent quoted market price, Hence, I have not used this method to arrive at the fair value of Transacting companies.

CCM Method

Under this method, the value of equity shares of a company is measured by applying the derived market multiples based on the market quotations of comparable listed companies possessing attributes similar to the business of the company that is being valued to the company metrics after making adjustments to such multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principal that such market valuations take place between informed buyers and informed sellers, incorporate factors relevant to valuation.

CCM Method derives equity value of a subject company basis the average multiple of a listed peer group. We find that there are no broadly comparable listed companies which operate in a similar line of business and have similar business model as that of Demerged Business of RESL. Hence, I have not used CCM method to arrive at the fair value of Demerged Business.

Further I understand that Resulting Company was recently incorporated and is yet to commence its business operations, hence we have not used this method for the purpose of arriving at the fair value of Resulting Company.

CTM Method

Comparable Transaction Multiple Method, also known as 'Guideline Transaction Method,' involves valuing an asset based on transaction multiples derived from prices paid in transactions of asset to be valued / market comparable (comparable transaction).

We find that there are no comparable transactions involving companies which operate in similar line of business and having similar operating/ financial metrics as that of the Demerged Business a. Hence, I have not used CTM method to arrive at the fair value of Demerged Business.

Further I understand that Resulting Company was recently incorporated and is yet to commence its business operations, hence we have not used this method for the purpose of arriving at the fair value of Resulting Company.

(iii) Asset Approach

NAV Method

This valuation method is based on the value of underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This valuation method is mainly used in a case where the firm is to be liquidated i.e. it does not meet the 'going concern' criteria or in a case where the asset base dominates earnings capability.

In the present case, demerged business would merge into resulting company on a 'going concern basis' and further there is no intention to dispose off the assets. In such a going concern scenario the relative earnings power, as reflected under the income and market approaches is of greater importance for arriving at the value as compared to the value arrived on the Net Asset Value basis considering the realizable value of the assets recorded in the books.

Given the above background, I have not used this method for arriving at the equity value of Demerged Business of RESL.

Further I understand that Resulting Company was recently incorporated and is yet to commence its business operations, hence we have used this method for the purpose of arriving at the fair value of Resulting Company.

X. RECOMMENDATION OF FAIR SHARE EXCHANGE RATIO AND SHARE ENTITLEMENT RATIO FOR THE PROPOSED AMALGAMATION AND DEMERGER

The fair share entitlement ratio has been arrived at on the basis of equity value of the Demerged Business and Resulting Company for the proposed demerger based on the various methodologies mentioned herein earlier. Suitable rounding off have been carried out wherever necessary to arrive at the entitlement ratio.

Based on the consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the share exchange ratio and share entitlement ratio as follows:

a) Recommendation of share exchange ratio for the proposed amalgamation of Mumbai Waste Management Limited ('MWML' or 'Amalgamating Company') with Re Sustainability Limited ('RESL' or 'Amalgamated Company') under Part B of the Scheme.

Based on the shareholding pattern of MWML as at the valuation date, we understand that the entire existing equity share capital of MWML is held by RESL and its wholly owned subsidiary RSISPL and hence as a result of which an economic interest of shareholders is same in MWML, RESL and its subsidiary RSISPL.

Recommendation of share exchange ratio for the proposed amalgamation and share entitlement ratio for the proposed demerger

Since MWML is effectively a wholly owned subsidiary RESL, upon the Scheme being effective, the entire existing equity share capital of MWML held by RESL and its subsidiary RSISPL would get cancelled and extinguished and no further equity shares would be required to be issued to equity shareholders of MWML i.e., RESL and RSISPL. We have therefore not carried out any independent valuation of MWML for the purpose of arriving at share exchange ratio for the aforesaid proposed amalgamation.

To the equity shareholders of MWML

“No equity shares of RESL would be required to be issued to the equity shareholders of MWML (i.e. RESL and RSISPL) for the proposed amalgamation of MWML with RESL”

- b) Recommendation of share entitlement ratio for the proposed demerger of ‘Demerged Business’ of Re Sustainability Limited (‘RESL’ or ‘Demerged Company’) into Ramky Sustainability Solutions Private Limited (‘RSSPL’ or ‘Resulting Company’) under Part C of the Scheme.**

To the Class A equity shareholders of RESL:

“89,625 (Eighty Nine Thousand Six Hundred and Twenty Five) Class A compulsory convertible preference share (Class A CCPS) of RSSPL of face value of INR 10 each fully paid up shall be issued and allotted for every 100 (One Hundred) Class A equity shares of INR 10 each fully paid up held in RESL”.

To the Class B equity shareholders of RESL:

“89,625 (Eighty Nine Thousand Six Hundred and Twenty Five) Class A compulsory convertible preference share (Class A CCPS) of RSSPL of face value of INR 10 each fully paid up shall be issued and allotted for every 100 (One Hundred) Class B equity shares of INR 10 each fully paid up held in RESL”.

To the preference shareholders of the RESL:

896 (Eight Hundred and Ninety Six) Class B Compulsorily Convertible Preference Share (Class B CCPS) of the Resulting Company of face value of INR 10 each fully paid up shall be issued against all outstanding 2,28,563 (Two Lakh Twenty-Eight Thousand Five Hundred and Sixty-Three) Optionally Convertible and Redeemable Preference Shares (OCRPS) of RESL of face value of INR 15 each fully paid up held in RESL”.

The rationale for the recommendation of above share entitlement ratio is covered in the next section (XI).

XI. VALUATION OF DEMERGED BUSINESS AND RESULTING COMPANY

Premise of the valuation:

Premise of Value refers to the conditions and circumstances how an asset is deployed.

In a given set of circumstances, a single premise of value may be adopted while in some situations multiple premises of value may be adopted. Some common premises of value are as follows:

- (a) highest and best use;
- (b) going concern value;
- (c) as is where is value;
- (d) orderly liquidation; or
- (e) forced transaction.

For valuing, the premise used is **going concern value**

Basis of the valuation:

Valuation base means the indication of the type of value being used in an engagement. Different valuation bases may lead to different conclusions of value. Therefore, it is important for the valuer to identify the bases of value pertinent to the engagement. This Standard defines the following valuation bases:

- (a) Fair value;
- (b) Participant specific value; and
- (c) Liquidation value

For valuing, the Base used is **Fair value**

Standards of Valuation:

The Valuation report is prepared as per the **ICAI Valuation standards**

Method and Approach of valuation:

For valuing, we have adopted the DCF method under Income approach using the projections

Under this method, the valuation comprises of 2 components as described below.

1. The Free cash flows from the period from FY 2023-24 to FY 2031-32;
2. The terminal value at the end of FY 2031-32.

The Sum of above two components is discounted with suitable factor considering expected return as discount rate to arrive present value of cash flows.

Recommendation of share exchange ratio for the proposed amalgamation and share entitlement ratio for the proposed demerger

The sum of the present values of the free cash flows to equity for explicit period and the terminal value gives the fair value of the enterprise.

Please refer below for the calculations of the value:
